

Supply Chain Manager

Do you want the opportunity to make a real impact on distribution of pharmaceuticals? Can you handle complexity and a diverse set of stakeholders? We are looking for our new Supply Chain Manager - Are you ready for your next challenge?

About the position

As Supply Chain Manager at Epione Medicine, you will play a critical role in ensuring the continuous supply of our products to the Danish Healthcare System. You will be responsible for sourcing raw materials, production planning of finished goods and optimizing the supply chain to ensure efficient and cost-effective production. We are offering you an opportunity to work closely with various functions such as Quality, Regulatory Affairs, and Business Development and you will be empowered to pursue opportunities to improve performances, which means that you will have the authority to drive optimization activities that will increase efficiency and reduce costs within the supply chain.

Responsibilities:

- Planning of production and raw materials
- Ensure overview of overall production capacities in close collaboration with management
- Maintaining master data in our ERP system Business Central
- Create measures and analysing of data to improve overall equipment effectiveness
- Support improvement and digitalization projects
- Evaluate, recommend, and implement improvements to lower inventory, reduce stockouts, and improve overall delivery performance

You will enter a professional, fast-paced and ambitious startup-environment where distance from thought to action is short and where we collaborate closely with internal and external stakeholders. You will join us in an exciting growth phase that includes Lean elements and development of a more automatized and digital production.

The office is located on Avedøre Holme 10 km outside of Copenhagen.

Supply Chain Manager

Who are we looking for?

We are looking for a proactive and solution-oriented individual who is comfortable taking responsibility. You might have experience as or are currently working as a Supply Chain Manager. Preferably, you have a relevant university degree within Supply Chain, Finance, Business, Engineering or similar.

In addition, we like to see that you

- Have a good system and business understanding
- Have a natural flair for planning and coordination
- Are motivated by optimization and development
- Have excellent skills within data analysis and advanced user in excel
- Are open and honest, and when faced with challenges you engage
- Ability to work with limited supervision with frequent changes in priority
- Are fluent in English, both spoken and written. Knowledge of the Danish language is not a requirement.

You should have a strong work ethic and an ability to handle several complex tasks. In addition, you can work in a busy work environment and bring good sense of humor to your work. Finally, good communication and cooperation skills are essential as well as a curiosity to understand the Danish Healthcare System and pharmaceutical industry.

Working at Epione Medicine

Epione Medicine supplies medicine to the Danish Healthcare System. Our products are parallel imported from certified wholesalers in EU countries and are sold in Denmark under the same conditions as the original manufactures. We are a start-up which means working at Epione Medicine is an opportunity to take on responsibilities within your working field.
